Dedicated backend engineer with 3.5 years of experience specializing in C# and .NET. Skilled in database management (MSSQL Server, MongoDB), frameworks (Asp .NET Core), and tools (Git, AWS, Docker). Adept at problem-solving, I received accolades for outstanding contributions and dedication during team evaluations.

Work Experience

Software Engineer	**Wunderman Thompson**	March 2024 - Current

- Develop scalable software solutions, emphasizing clean, efficient C# code.
- Innovate solutions for complex business challenges, aligning with product goals.
- Collaborate closely with QA to ensure high-quality, user-centric feature delivery.
- Mentor team members, fostering skill growth and knowledge sharing.
- Communicate effectively with stakeholders, documenting technical decisions and processes.

Software Engineer	**ASTHA-IT**	February 2021 – February 2024

- Managed client communication, conducted requirements analysis, estimated project timelines, mentored junior team members, and actively participated in coding for feature delivery at StrataSpot.
- Deployed and integrated CI/CD pipelines, conducted thorough code reviews, implemented third-party integrations, and executed unit testing in a specialized role focused on CI/CD implementation.
- Demonstrated expertise in developing various features for the Apex4u e-commerce platform, including payment service integration, discount modules, AWS S3 implementation, and catalog management, utilizing NextJs, .NET 6.0 & MongoDB.
- Improved features of a social media platform for Hawai'i-based volunteers in the Global Aloha Initiative, using Angular, .NET Core 3.1 & PostgreSQL.
- Contributed significantly to Transcom Digital's e-commerce platform, involved in catalog management, report generation, import/export, and other areas, leading to reduced operating costs. Utilized NextJs, .NET Core 3.1 & MongoDB.

Internship (Part-Time)	**ASTHA-IT**	December 2020 – January 2021

- Collaborated with a development team to enhance user experience by implementing new features.
- Utilized Git for efficient code management and team collaboration
- Developed projects using React and Angular, including ecommerce and social media applications.
- Demonstrated expertise in C#, .NET, and integrated React into a pet project, showcasing in-depth technical knowledge.

Education

Bachelor of Science in Software Engineering (CGPA: 3.82 / 4)	**DAFFODIL INTERNATIONAL UNIVERSITY**	January 2017 – July 2021

Languages and Technologies

Languages	C#, JavaScript, TypeScript
Databases	MongoDb, PostgreSQL, MSSQL Server, Redis
Frameworks	Asp .NET Core, Asp .NET, .NET Framework, Entity Framework, Dapper
Tools	Git, Docker, AWS (EC2, S3, ELB, ASG, SQS, SNS), REST API, Postman, Kafka, Nginx
Others	DS & Algorithm, Multi-Threading, Unit Testing, Design Pattern and Principles

Certifications

1. Foundational C# with Microsoft	**FREECODECAMP**	2nd February 2024
2. Full Stack Asp.Net MVC Web Development	**DEV SKILL**	September 2020 – March 2021
